

Classroom Content Management System

Project Overview

The **Classroom Content Management System (CMS)** is a web-based application developed using Java and Spring Boot.

The system provides a platform where administrators can manage teachers and classrooms, while teachers can upload educational content and control which classrooms are allowed to access that content. Classrooms can log in and view only the content that has been specifically permitted to them.

Features

- Admin

1. Admin login
2. Add teachers
3. Edit teacher details
4. Enable/disable teacher accounts
5. Add classrooms
6. Edit classroom details
7. Enable/disable classroom accounts
8. View teachers and classrooms from the admin dashboard

- Teacher

1. Teacher login
2. View teacher profile
3. Upload educational content
4. Upload videos, images, PDFs and other supported files
5. Edit content details
6. Delete content
7. View uploaded content
8. Grant content access to specific classrooms
9. Revoke content access from classrooms
10. View which classrooms have access to content

- Classroom

1. Classroom login
2. View classroom profile
3. View permitted learning content

4. Access videos
5. View images
6. Open PDF documents
7. Access other permitted files

Technology Stack

- Backend

- Java 21
- Spring Boot
- Spring Web
- Spring Data JPA
- Hibernate
- Maven

- Database

- MySQL

- Frontend

- HTML5
- CSS3
- JavaScript

- Server

- Embedded Tomcat
